## At school

Elly, Tim, Samuel and Betty are in the 5<sup>th</sup> year of St. Mary's School. The boys and girls are even in the same class. But unfortunately, they don't sit next to each other. Their teachers think they would talk too much.

The four children have been friends since the first year. And they have many things in common: they like to play table tennis, go to the cinema or just hang out with each other. But there are also differences between the four friends.

If you want to find out more about them, start reading the clues and fill in the gaps.
