a) Social media are for me _____

Examples are _____

b) You can _____

Social Media Musts for Teens

A1 Today, teenagers spend too many hours with social media. If you are a teenager, here are some rules you should keep in mind while using any kind of social media.

- a) Read the seven musts.
- b) Write down the reasons why they are so important.

must	reason(s)
1. Use privacy settings!	
2. Think before you post a comment!	
3. Be respectful!	
4. Be careful about revealing your location!	
5. Watch the clock!	
6. Don't post embarrassing pictures of you kissing someone or doing something stupid.	
7. Don't watch everything in the Internet.	

A2 Choose five musts from A1. Make creative signs with symbols of the five musts for your **netzwerk lernen**. The signs should always remind you of how to use social media. Write a caption under each symbol.

Commenting on your likes or dislikes

- A1** It is easy to write a comment in which you say that you like or dislike something without giving reasons. To complete your comment, you need to list one or two reasons to explain why you like or dislike something.

- Here are two examples of positive and negative comments on this Instagram®-picture about online shopping.

 YES (I like)	NO (I dislike) 
<p>If your answer is yes, think about how online shopping benefits you.</p> <p>Example answer: Yes, I really enjoy shopping online. It is so convenient as I don't have to step out in the sun, deal with the heavy traffic and carry so many things in my hands. Besides, I can get better prices online because shopping websites offer discounts from time to time.</p>	<p>If your answer is no, think about the advantages of traditional shopping and the disadvantages of online shopping.</p> <p>Example answer: No, I am not a big fan of online shopping. The images and descriptions on the website are sometimes misleading. Therefore, I like going to the stores and actually seeing and trying the products. This experience helps me to make better decisions. Moreover, online shopping has security concerns. I am not that sure about it.</p>
